24 In discussing Group 2 rules, geographic scope of the T_I rules, it is clear that the TAC Literature
25 Review is being weighed heavily. TAC should be prepared to explain the scope of the Literature
26 Review and its limitations, so that application of the Literature Review and Primers are not
27 extended beyond the data so to speak. Direction from the Board and budget constraints limited
28 the scope of the Literature Review.

30 **Tuesday, June 3, Forest Practice Committee –**
31

32 In attendance: in addition to Monday's attendees, Paul Mason, Chris Zimny.
33

34 Continuation of discussion of T_I Rule Review. National Marine Fisheries Service (NMFS)
35 staff who will be working with the Board on this review of T_I Rules and anadromous fish issues
36 generally were present at Monday and Tuesday's Forest Practice Committee workshop and
37 meeting. Charlotte Ambrose and Paul Mason raised the issue of the scope of this T_I Rule
38 Review, to determine the amount of time and effort NMFS would put into this. (This question of
39 the depth and scope of this rule review was also raised by Gaylon Lee, WQCB, and Glenda
40 Marsh, DFG at earlier workshops). Zimny indicated that the T_I Rule review would be as broad
41 and comprehensive as the letters, questions, and suggestions that were sent to the Board were.
42 The Board was reviewing the issues and questions raised by the stakeholders about the T_I
43 Rules.
